OFESSIONAL SUMMARY

Results-driven Full-Stack Web Developer and Information Systems senior student with hands-on experience in building scalable web applications. Proficient in designing robust backend architectures, from 3NF relational schemas to multi-tenant databases, alongside responsive frontend interfaces. Adept at leveraging modern frameworks like React and Django REST Framework to deliver high-performance solutions tailored to business needs.

TECHNICAL SKILLS

- Frontend: React, Vite, Tailwind CSS, Lucide React, Swiper.js.
- Backend: Python, Django, Django REST Framework, Node.js, PHP.
- Databases & Architecture: PostgreSQL, MySQL, Oracle Database, Multi-tenant SaaS Structures, 3NF Normalization.
- Tools & Deployment: Git, GitHub, Docker, Vercel, VS Code, Termux.
- UI/UX Design: Figma (User Journey Mapping, SVG UI, Dark Mode Implementation).
- Additional Knowledge: Cybersecurity (Nmap, Metasploit, msfvenom), Machine Learning (Knowledge Tracing, GRU, Transformers).

PROFESSIONAL EXPERIENCE & PROJECTS

Freelance Full-Stack Developer | Sana'a, Yemen | Date – Present

- E-Commerce Multi-tenant Platforms: Architected and designed isolated multi-tenant database schemas for local automotive spare parts and furniture e-commerce platforms, ensuring secure vendor data isolation and efficient order management.
- Wahat Al-Fikr Publishing System: Designed a strict 3rd Normal Form (3NF) Entity-Relationship model and developed interactive frontend component views using React for a digital book and article publishing platform.

- Alwaleed Philanthropies Web Platform: Built and deployed the application on Vercel, configuring XML sitemaps and Search Console indexing to optimize search engine visibility.
- Reaya Medical Application: Mapped comprehensive customer journey flows and generated scalable SVG interface layouts with full Dark Mode support using Figma.
- Intelligent School Assistant API: Developed backend routing, serializers, and query execution logic using Django REST Framework to serve as an inference engine for an automated school schedule and policy assistant.

EDUCATION & RESEARCH

Sana'a University | Sana'a, Yemen

Bachelor of Science in Information Systems | Expected Graduation: 2027

- Academic Research: Co-authored a research paper examining predictive modeling of student procedural errors and self-correction resilience using advanced sequence modeling algorithms (GRU and Transformer networks).
